

Sonic Grade Sensor

Replacement Sensor for your Vögele Paver

Tired of having to replace a defect grade sensor with costly replacements?

Grade sensor damages are common and typically requires expensive replacements from the paver manufacturer.

Until now! Introducing the VAD224 Sonic Grade Sensor, a **high quality replacement grade sensor** to Vögele pavers, directly from the sensor manufacturer.

The VAD224 Sonic Grade Sensor **connects directly to the Vögele asphalt paver**. When plugged in, the machine recognizes the sensor and starts working immediately. The Sensor can be used as a

stand-alone grade sensor or on a **Multi-Plex Big Ski** averaging beam.

And there is more! This fully compatible sensor **displays whether the sensor is working correctly** or in fault condition.

Should bad luck strike again, **our sensor is fully repairable** and our repair shop has a turnaround time of less than 5 days.

**NO MORE COSTLY
REPLACEMENT
SENSORS!**

Snap Connector ensures
super easy mount and
dismount of sensors.
