

Mounting Bracket For remote controller

The Mounting Bracket services a solid mounting of a remote controller, when the operator is not holding it in his hand.

The controller will be securely kept in the bracket during cable pulls and heavy vibrations from the screed.

While in the Mounting Bracket, the controller can be operated without picking it up, or it can easily be clicked on and off the Mounting Bracket if needed.

The Mounting Bracket is easily mounted in an optimal position for operation.

Mounting Bracket Specifications	
Part number	S-50576
Application	Mounting Bracket for Remote Controller
Dimensions (LxWxH)	7x10x6cm / 2.7x4x2.4in
Maximum clamping Ø	32mm / 1.25in
Weight	170g / 0.4lbs
Material	Steel
